

INSTRUCTIONS FOR TOWING TUBES OR OTHER WATER SPORTS EQUIPMENT

-We have installed a towing mechanism called a “Turbo Swing” for which you can attach tow ropes (please see picture below)

- The Turbo Swing wraps around the outboard motor and has a clip where the rope is easily attached.
- Please ensure the small looped end of the rope is attached to the clip and not tied directly onto the clip where it can become knotted and stuck.
- More information and videos can be found on the website at turboswing.com

- When attaching the rope to the tube itself, please use the diagram below to help safely complete this.
- Improper use can result in tube damage and impose added safety risk.

- Please remember to use an orange flag to signal to other boaters anytime someone is down in the water.
- All guests assume total responsibility for their safety and are also liable to know and follow all laws on the water. -Red Dog Boating is not responsible should any accident occur.
- Please carefully read and understand boating rental contract signed prior to boating.
